Usagi Ebanking Innovation (UK)

Reduce Costs
By centrally updating ATMs there is no need to visit ATMs or use other manual methods to transfer information.

Efficiency & Speed
The entire fleet of ATMs can be updated in a single operation simultaneously—faster than Operating System methods.

Faster Technology
Guaranteed to be faster than Windows system copy methods by using unique compression technology.

Key features and benefits:

- Secure Remote Desktop to any ATM (**No** third party servers, **No** passwords shared, **No** third party software or DLLs, Secure **end-to-end** connection)

- Automated mass simultaneous distribution of software, graphics, software updates and branding updates

- Cost reduction by centralising the distribution from a central location

- Dynamically update ATM graphics, audio files, branding, etc. centrally
